CARE AND REHABILITATION

Coronavirus Disease (COVID-19): Updates to Residents and Family Members

As Coronavirus Disease (COVID-19) continues to spread throughout our country and communities, we are focused on providing care while maintaining a safe facility for our staff and visitors. Please find below various updates on this rapidly evolving situation.

NO-VISITOR POLICY

To stem the spread of COVID-19 and help keep our residents, visitors and staff safe, our facility implemented a no-visitor policy on March 11, 2020 until further notice. No visitors, except in end of life situations, will be allowed in any resident areas until further notice. All visitors who meet exclusion criteria must pass a health screening.

VIRTUAL VISITS

We regret restrictions on visitation have become necessary because of the COVID-19 outbreak. The facility has iPads available to residents for use in conducting virtual visits with friends and loved ones. Staff are available to help residents use this great communication tool. In lieu of person-to-person visits, families are encouraged to use virtual communication, such as FaceTime®, Zoom® or Snapchat®.

UNIVERSAL MASKING

As COVID-19 continues to spread across the communities we serve, we continuously evaluate and adjust our protocols as needs evolve and the situation on our frontlines change. Effective April 2, 2020 as per the Ohio Department of Health, we are implementing a universal masking policy requiring all staff at our facility to wear a surgical mask. This is a precautionary measure intended to better protect each other and our residents.

STAFF IMPACTED BY COVID-19

The safety of our residents and staff is our top priority, and we have strong infection prevention protocols in place in line with CDC guidelines to protect our staff. If a team member in our facility is diagnosed with COVID-19 or is exposed, we follow CDC guidance for health care workers, including quarantining. We continue to reinforce strong infection prevention measures, including screening of all staff and essential medical personnel upon entry into our facility.

PERSONAL PROTECTIVE EQUIPMENT

For the health and safety of our staff and residents, we have updated our personal protective equipment (PPE) standards to help conserve supplies as we test and care for residents under investigation with COVID-19. Amid the challenges nationwide with PPE shortages, we have supply to meet our current needs but expect the demand will increase significantly. We continue to work diligently to secure additional supplies from all available sources.

RESIDENTS UNDER INVESTIGATION AND COVID-19 POSITIVE CASES

We are closely monitoring our residents for symptoms of COVID-19. When necessary and appropriate, residents are tested under the guidance and direction of their physician. To date, we have no confirmed cases of COVID-19. However, we may be called upon to provide care to COVID-19 positive residents in the very near future. When that time comes, we have instituted a COVID-19 isolation unit and we will follow the recommended procedures and staffing protocol established by the CDC and the Ohio Department of Health.

Coronavirus Disease (COVID-19): Updates to Residents and Family Members

GENERAL ORGANIZATIONAL EFFORTS REGARDING COVID-19

The latest on the facility's COVID-19 efforts:

- We continue to educate and update our staff on the latest guidance from the CDC and state health agencies to keep themselves and residents safe.
- We have held simulation exercises for treating COVID-19 residents, have plans in place to address increased resident volume and have implemented visitor restrictions.
- We have instituted COVID-19 policies and procedures recommended by state and federal health agencies.
- Signage about symptoms and travel history has been placed in resident and visitor areas.
- We have introduced additional cleaning and sanitizing as an added layer of safety and precaution.
- Residents no longer gather for communal meals as meals are prepared and delivered to the resident's room.
- We are encouraging use of technology versus in-person meetings except for end-of-life situations.

COMMUNICATION AND HOTLINE

We are determined to remain transparent in updating our residents, families and the local community in this evolving health crisis.

While the facility does not currently have any resident or staff member who has tested positive, we are committed to keeping you apprised of any developments. To that end, we have established an emergency communications hotline that will be updated with pertinent information as it becomes available. **The hotline number is 855-363-7437.** Keep in mind, the hotline is not manned, so please don't expect to talk to a person. It's strictly a recording that will be updated as often as is necessary to keep you abreast of any new developments regarding the COVID-19 outbreak. If your loved one is in a facility that learns a resident or staff member has tested positive for COVID-19 you will be notified within twenty-four (24) hours. You can go to www.coronavirus.ohio.gov for a list of all Ohio nursing homes that have reported residents or staff who have tested positive for COVID-19.

The facility remains vigilant in its preventative measures and we are grateful to the guidance of local and state healthcare agencies, including the local health department. We remain committed to caring for your loved one to the best of our ability and thank you for the opportunity to serve. Our thoughts and prayers are with residents and their families during this uncertain national health crisis.
